

2023 AUCTION SALE

POOGINOOK

P/GK

Merino and Poll

350 Rams - On Property and Online via Auctions Plus (Sale 661)
12.00pm Tuesday 26 September 2023

pooginook.com.au

WELCOME TO THE 2023 POOGINOOK MERINO AND POLL RAM SALE

Pooginook's strategy is to deliver you a mules free high-performance animal, proven and ready to go to work in your environment. Combining our scale, quality data, and knowhow it redefines the potential of delivering more lambs and elite wools end-customers are demanding.

We are excited to welcome our new Pooginook leadership team. Recognising shifts in client needs, John Sutherland now focuses on the Pooginook genetic program and enhancing client support, ensuring client success and profitability in these ever-changing times.

Lead by Andrew Glover, we've streamlined our farm operational team to ensure optimal farm operations and animal performance. Andrew brings valuable skills that will continue Pooginook's tradition of high production, quality data and high profits. His fresh perspective will infuse new ideas while maintaining operational stability.

Pat Brown has been appointed as the Pooginook Stud Advisor, where he will continue to support Pooginook events, on-farm operations, and stud classing. Pat's decades of sheep breeding experience will continue to help shape the future of Pooginook genetics.

As overseer with 4 years' experience, Baylee Stapleton manages data collection and farm tech focusing on-farm efficiency and delivering quality products. She also assists with ram sales and sheep grading.

Thank you for your continued support. At Pooginook we believe consistency in genetics and quality data means you can select with confidence.

I hope you have a successful day at the sale and welcome feedback about the sheep and how we can help you achieve your breeding objectives.

John Sutherland
Genetics and Sales Manager

POOGINOOK'S GOAL

Provide a large selection of mules free, high performance, balanced rams backed by quality data.

Auction Registration

All prospective buyers must register by 11am on the sale day. Outside agents are welcome and must register prospective buyers by 11am on the sale day to gain a rebate.

Delivery

Sheep sold on the day must be taken from Pooginook by Monday 9 October 2023. All care will be taken of the rams, however responsibility for loss or injury will be borne by the buyer from the fall of the hammer. We recommend Livestock Insurance for all rams.

Fibre Diameter Analysis

Riverina Wool Testers, using CSIRO Laser Scan, tested the rams on 18 April 2023. The rams had 6.0 months wool growth at the time. This information should be used only as a guide. Paraway Pastoral Company Limited accepts no responsibility for the accuracy.

Health Status

Pooginook is a Brucellosis Accredited Free Flock and has Nationally Accredited Johnes Disease Market Assurance Status MN3.

The Pooginook Stud Flock has Owner-declared footrot free status.

Auction Selling Agent

Nutrien Finley and Elders Jerilderie. Pooginook rams are sold exclusive of GST.

Pooginook Semen Marketing Policy

All Pooginook rams are sold under the condition that 100% of the semen marketing rights are retained by Paraway Pastoral Company Limited.

If you purchase a Pooginook Ram:

1. The purchaser/s must be nominated at the point of sale.
2. You can use semen by the ram for your own flock requirements.
3. Under this selling agreement you are not permitted to market semen from the ram.
4. Semen marketing rights can be negotiated with Paraway Pastoral Company Limited.
5. If the ram is re-sold the purchaser must be made aware that the semen marketing rights are retained by Paraway Pastoral Company Limited.

MEASURED PERFORMANCE

Average of 300 Poll Rams Lot 1-120, 171-350

FD	CV	SD	CF
17.9	16.9	3.0	99.5

Average of 50 Horn Rams Lot 121-170

FD	CV	SD	CF
17.7	17.3	3.1	99.6

Rams born mid May-June 2022

- Wool hip tested 18 April 2023
- Shorn and fleece weighed 10 May 2023

Measured Performance Data

Sire	Sire of ram
BT	Birth type (single, twin, triplet)
FD	Fibre diameter (Laser scan micron test)
CV	Coefficient of variation of fibre diameter
SD	Standard deviation of fibre diameter
CF	Comfort factor (No. of fibres under 30 micron)
DNA P/H	DNA test for PP, PH, HH status.

AUSTRALIAN SHEEP BREEDING VALUES (ASBV)

Raw data is collected on all progeny (ewes and rams). A 50k DNA genomic test was taken to provide full parentage and predictive genomics to increase the ASBV accuracy. Our data is analysed by MerinoSelect to generate an ASBV for the production traits. Pooginook has been benchmarking itself across the industry through entry of sires into sire evaluations and the Sheep CRC Information Nucleus flock.

ASBV Average of Poll Rams Lot 1-120, 171-350

PWT	YWT	YFAT	YEMD	YFD	YCFW	YSL	EBWR	WR
6.3	8.2	-0.1	0.6	-1.3	19.7	10.3	-0.4	0.08

ASBV Average of Horn Rams Lot 121-170

PWT	YWT	YFAT	YEMD	YFD	YCFW	YSL	EBWR	WR
5.7	7.2	-0.4	0.5	-1.4	20.3	9.9	-0.3	0.09

Data Quality Score (DQS)

The DQS is generated by Sheep Genetics as an overall benchmark of the quantity, quality and timeliness of Stud data.

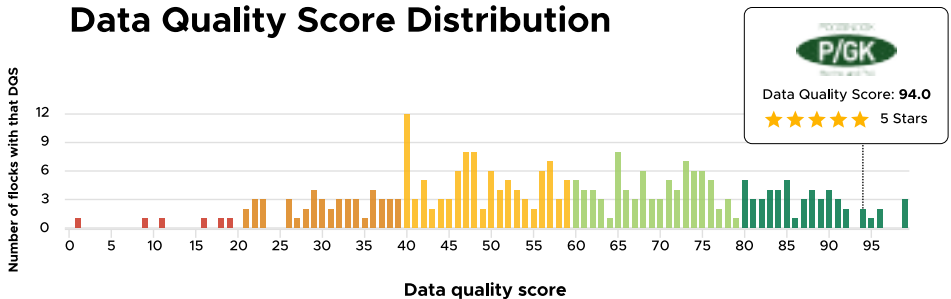

What Is Pooginook's Score?

Date Quality Score: 94/100

5 Star Rating

This rating means that the Pooginook flock is in the top 2.8% of the MerinoSelect analysis with a DQS.

Data Quality Score Distribution

ASBV Data

PWT	Post Weaning Weight (kg) - Rams with more positive PWT ASBVs produce progeny that grow quicker and are heavier post weaning (5-10 months). WT ASBVs estimate the genetic difference between animals in live weight at a given age.
YWT	Yearling Weight (kg) - Rams with more positive YWT ASBVs produce progeny that grow quicker and are heavier as a yearling (10-15 months). WT ASBVs estimate the genetic difference between animals in live weight at a given age.
YFAT	Yearling Fat Depth (mm) - Rams with more negative YFAT ASBVs produce progeny that are leaner as a yearling (10-15 months). FAT ASBVs estimate the genetic difference between animals in GR fat depth.
YEMD	Yearling Eye Muscle Depth (mm) - Rams with more positive ASBVs for YEMD will produce progeny that have more muscle, independent of weight, and a higher lean meat yield as a yearling (10-15 months). EMD ASBVs estimate the genetic difference between animals in eye muscle depth at the C site.
YFD	Yearling Fibre Diameter (μm) - Rams with more negative YFD ASBVs produce progeny which are finer as a yearling (10-15 months).
YCFW	Yearling Clean Fleece Weight (%) - Rams with higher YCFW ASBVs produce progeny which will cut more wool as a yearling (10-15 months).
YSL	Yearling Staple Length (mm) - Rams with more positive YSL ASBVs will produce progeny with longer fibre length as a yearling.
EBWR	Early Breech Wrinkle (Score) - Rams with a lower breech wrinkle will produce progeny that have a lower degree of wrinkle in the breech area. EBWR is expressed as a score.
WR	Weaning Rate (unit of lambs) - Rams with more positive WR ASBVs will sire daughters that wean more lambs per ewes joined.

Note: a more comprehensive list of ASBV's are available on pooginook.com.au

POOGINOOK'S BREEDING DIRECTION

At Pooginook we combine visual assessment and ASBVs to breed a dual-purpose Merino that is profitable, ethically produced and can handle multiple climates. We believe in breeding a mules free, well balanced, high performing sheep, with good body structure and wool quality.

We believe our breeding objectives below are going to achieve optimal commercial performance and ensures Pooginook and our clients are in-line with consumer demands.

Ewe Efficiency

To breed easy doing ewes that deliver high weaning percentages and weaning weights, whilst optimising wool production and adult body weight.

Fast Early Growth

To provide options for clients to turn off more lambs earlier and join ewe lambs.

Mules Free

To breed robust fly strike resilient animals that require no mulesing.

Carcass

To minimise increasing adult body weight by balancing carcass traits with fast early growth. To breed animals that are easier care, lower maintenance and finish quickly.

Elite Wools

To maintain our existing lifetime production of high-quality wool that can handle varied climates.

Welfare And Health

To move towards a lower maintenance, more resilient and healthier animal with better welfare by aiming to reduce WEC and DAG.

RAM MANAGEMENT GUIDE

Mules free management

Ram inclusion rate:

- Join rams @ 3% in ewe lambs (7-12 months old)
- Join rams @ 2.0% in maiden 18-month-old ewes (incl. at least 1 older ram/mob)
- Join rams @ 1.8% in adult ewes

Shear: rams to be shorn twice a year. Aim to shear rams 8-10 weeks prior to joining. Avoid shearing ram within 6 weeks of joining.

Paddock: run with other Merino rams and avoid running with other breeds. Graze in a well-watered, well sheltered, good paddock all year around.

Annual soundness check: completed 6-8 weeks prior to joining and again at joining. Seek veterinary advice to undertake the assessments.

Toes: rams should not be lame, so if required, trim their hooves to a normal shape.

Testicles: should be firm, springy on palpation with scrotal circumference above 28cm with no abnormal lumps on palpation. If your rams have abnormal lumps on their testicle, get a blood test to check for ovine brucellosis.

Teeth: ensure all animals have a full mouth of teeth.

Torso: rams need to be in body condition score 3.3 – 3.5 for joining. If not, supplementary feeding needs to start at least 8 weeks prior to joining. Make sure it is a high-quality feed and feed enough of it to improve their condition sufficiently prior to joining.

Tossle: examine prepuce and penis for evidence of inflammation and damage.

Any ram that has been sick with a fever in the last eight weeks should not be used for mating as high temperature disrupts semen production.

Teasers: we recommend the use of teasers if joining October to December.

Class: annually class rams post joining and check for soundness. The latest ASBV data for your rams can be made available in your RamSelect account.

Ram Nutrition

Body condition score (BCS): Rams should be 3.3 – 3.5 BCS at joining. Rams to be managed at 3.0 BCS throughout the nonreproduction periods. Implement a supplementary feeding program if required to ensure rams achieve these targets.

Pre-join: Supplement with a high protein source (e.g. 300-500 g/hd/day lupins) 6 weeks pre joining.

Grain adaption: If ewes are being fed a grain ration prior joining and through joining, make sure rams are well adapted to the same grain ration prior to joining to prevent acidosis from sudden intake of ewe ration.

Animal health

Blow fly preventative: It's recommended to apply early season fly treatment on their horns and polls. Seek consultation from your livestock advisor for a tailored fly program.

Worm management: Worm egg count is recommended prior to treatment to determine worm challenge. 8 weeks leading up to and throughout joining is a critical time to manage worm burdens.

Vaccination: 6-8 weeks prior to joining annually vaccinate rams with 6in1. Consider another booster under high challenge situations such as grazing lush green feed, grain supplementation and rapid changes of diet (autumn break).

Brucellosis: PGK rams are accredited Brucellosis free. Annually check for testicle abnormalities and size.

Johnes Disease (OJD): PGK rams are free of OJD and have MN3 assurance status. Seek veterinary advice if taking rams into an OJD area.
